

CAPABILITIES STATEMENT

Core Capabilities

Strategic Planning and Performance Measures

Establishing strategic, performance-based management systems allowing organizations to align business activities to strategies coupled with the capability to monitor and measure performance toward strategic and specific performance goals.

Policy Development and Implementation

Developing customized policy solutions that address the challenges presented by rapidly evolving technologies and that adapt to changing national and departmental priorities. Drafting processes to make existing policy actionable.

Outcomes-based Planning and Assessments

Improving the client's ability to effect high-impact, outcome-based plans and assessments across all service areas. Providing leaders with insights needed to develop long-range operating objectives and to determine in advance how the objectives will be accomplished.

Information Sharing and Collaboration

Offering the government best approach options to establish organizational coherence, building capacity to collaborate effectively, establish precision access to shared information and provide shared understanding and shared commitment to mission objectives. Transitioning Information Sharing Policy and vision into process, practice and procedure to enable parallel planning and parallel execution in a tightly orchestrated network-centric, collaborative environment.

Information Fusion and Operations Coordination

Providing Fusion and Analysis Centers with ability to aggressively integrate industry, government and DoD capabilities to analyze real-time operations, intelligence, surveillance, and reconnaissance information and community of practice data-holdings. Innovatively integrating the Common Operational Picture (COP) into the key organizing system for exposing, accessing, distributing, and visualizing critical information necessary for situational awareness and for effective, enterprise-wide decision making and execution.

Intelligence and Operational Services

Providing intelligence expertise and experienced staff operating within military and law enforcement decision making and execution cycles.

Information Systems Solutions and Support

Integrating innovative technology systems, database support and comprehensive infrastructure services to provide end-to-end IT solutions for mission focused programs. Providing IT expertise ranging from help desk services and database technical support to application development and advanced architectural design.

Program Management

Reducing costs, increasing quality and ensuring on-time deliverables by employing management best practices in support of our ultimate goal of superior customer satisfaction. Providing full life cycle program management support through experts ranging from documentation management and administrative support specialists to subject matter experts and certified project managers.

The McKenna Principals is a small woman-owned professional services firm offering the support of talented professionals who provide policy and planning, intelligence, law enforcement, operational, program management, and technical expertise in the homeland and national security arenas.

Our passion is to develop innovative solutions for our customer's toughest challenges.
